

Clinikally (YC S22)

- Python Skills: You should be very comfortable with Python and async programming.
- LLM Experience: You have used APIs from OpenAI, Anthropic, or Gemini to build more than just a simple chatbot.
- Agent Knowledge: You understand how to give an AI tools (functions) to call so it can perform real tasks.
- Vector Databases: Basic experience with Pinecone, FAISS, or similar tools for searching through product data.
