

# Keywords Studios

?

Strong programming skills in Python

? Understanding of Data Structures and Algorithms

? Knowledge of Machine Learning fundamentals

? Understanding of Natural Language Processing (NLP) concepts:

- Tokenization
- Embeddings
- Text Classification
- Named Entity Recognition (NER)
- Semantic Search
- Transformer Models

? Understanding of Generative AI concepts:

- Large Language Models (LLMs)
- Prompt Engineering
- RAG (Retrieval-Augmented Generation)
- Fine-tuning concepts
- AI Agent fundamentals

? Familiarity with AI/ML frameworks:

- PyTorch or TensorFlow
- Hugging Face Transformers
- LangChain, LlamaIndex, or similar frameworks
