

Neilsoft

Advanced Machine Learning

Experience in:

- Deep learning model development, Representation learning, Transformer architectures, Transfer learning, Multimodal ML systems

Computer Vision Experience with:

- Object detection, Image segmentation, Document layout analysis, OCR pipelines

NLP / LLM Systems

Experience with:

- Transformer-based models, Retrieval-Augmented Generation (RAG), Embedding models, Semantic search systems

MLOps

Experience building production ML systems using:

- ML experiment tracking (MLflow / Weights & Biases), Model versioning, CI/CD pipelines, Monitoring and retraining pipelines

Data Systems

- Vector databases, Data pipelines, Feature engineering systems
