

Turing

- Minimum **3+ years** of overall experience as a **Machine Learning Engineer or Software Engineer (ML-focused)**.
- Strong proficiency in **Python** for machine learning and data workflows.
- Hands-on experience with **model training, evaluation, and inference pipelines**.
- Solid understanding of **machine learning fundamentals** (supervised/unsupervised learning, evaluation metrics, optimization).
- Experience working with **ML frameworks** (e.g., PyTorch, TensorFlow, JAX, or similar).
- Ability to understand, navigate, and modify **complex, real-world ML codebases**.
- Experience writing **readable, reusable, and maintainable production-quality code**.
