

AirBills

- Strong Front-End Development skills, including modern JavaScript frameworks/libraries (e.g., React, Vue, or similar) and component-based architectures.
- Proficiency in Responsive Web Design, including HTML5, CSS3 (or CSS-in-JS, preprocessors), and building interfaces that work across browsers and devices.
- Solid foundation in Web Development and Software Development fundamentals, such as version control (Git), testing, debugging, performance optimization, and RESTful API integration.
- Familiarity with Back-End Web Development concepts and collaboration with backend services (e.g., Node.js, Python, or similar) is a plus.
